

# It's okay to...

make small websites  
do everything in a web browser  
use your favourite tools  
use your favourite text editor  
imagine what would make life easier  
care about function and aesthetics  
not know everything  
ask questions  
say no  
throw things away  
consider multiple perspectives  
like HTML, CSS and JavaScript  
not like HTML, CSS and JavaScript  
switch off your computer from time to time  
be kind to yourself, be kind to others  
have coffee with colleagues
